## **Councilmember Floreen Praises Progress on Inter-County Connector, Urges State to Adopt Master Plan Alignment**

"As Chair of the Council's Transportation and Environment Committee, I'm delighted with today's announcement that the state is moving ahead to study alignments for the Inter-County Connector.

"Forty years of development in this County has been premised on the ICC's being aligned in accord with our Master Plans. Unfortunately, our residents have been paralyzed by traffic congestion throughout that period, as the ICC has been delayed and deferred.

"I'm delighted that the state is taking this long-overdue step forward, and I strongly urge the state to adopt the Master Plan alignment. The quality of life of the existing community hangs in the balance."
